

CAPABILITIES BRIEF

LIGHTING THE PATH TO DISCOVERY

Eagle Global Scientific, LLC (EGS) is a certified 8(a) Alaska Native Corporation (ANC) that contracts with federal agencies and military partners through both the direct award and competitive procurement processes. Our strongest core competencies combine expertise in Infectious Diseases and Public Health Emergencies with extensive Public Health Communication experience and proof-of-concept research. We provide the skilled personnel and resources necessary to bring effective contracting strategies to federal agencies. EGS is committed to providing the best clinical, laboratory, and administrative support services thereby increasing efficiency, streamlining workflow processes, and ensuring the success of the mission.

As a small business, EGS is singularly qualified to support federal programs in spheres where previously only large companies have been players. Our 8(a) status allows EGS to accept direct awards (sole-source contracts) up to \$22 million. Awards to an 8(a) ANC cannot be protested. EGS is fully on-ramped to both the OASIS SB Pool 4 and the SB 8(a) SubPool 4 (NAICS 541715 Scientific Services) contracts.

ABOUT US

We believe that local, on-site program management is the most effective way to ensure proper adherence to contract requirements and to maintain customer and employee satisfaction. EGS has access to commercial laboratory space and the equipment available to support a wide array of diagnostic tests. EGS maintains Federal Wide Assurance (FWA) for the protection of human subjects, and when a customer needs to expand past their current laboratory capacity, EGS provides that support. We are able to directly sub-contract to foreign organizations; our global health deployment capabilities are supported by our Foreign Travel Working Group (FTWG) who provide the most up-to-date travel information to our employees. EGS follows ISO 9001:2015 requirements for quality management.

GLOBAL OVERVIEW

EGS has provided support to international public health emergencies since 2010. Our first deployment as a single implementor for PEPFAR resulted in EGS' presence in every PEPFAR country; this service continues today

*Lighting the Path
to Discovery*

and has saved millions of lives across the globe.

Our personnel also work closely in the CDC's Emergency Operations Center (EOC) to support the global effort to address SARS-CoV-2. Media consultants staff the JIC and consult on strategy and content. Our data scientists support the mission on site and through deployments. EGS actively assists the global public health community with pandemic response. Previously, EGS supported the Division of Global Migration and Quarantine (DGMQ) to address the emergence of MERS-CoV by deploying to many airport/travel screening locations and performing contact tracing. We were also selected by CDC leadership to internationally deploy public health professionals for the Zika response in Colombia, Puerto Rico, and Brazil.

CAPABILITIES

- Infectious Diseases
- Military Medical Research
- Public Health Emergency Response
- Data Analytics
- Pandemic Response & Support
- Surveillance & Epidemiology
- Advanced Diagnostics
- Public Health Communication
- Regenerative Medicine
- Precision Medicine
- Virtual Health
- Clinical Research & Investigation
- Contract Management & Administration
- Program Support & Contract Transition Plan
