

# INFECTIOUS DISEASES

LIGHTING THE PATH TO DISCOVERY

Eagle Global Scientific, LLC (EGS) is a certified 8(a) Alaska Native Corporation (ANC) that contracts with federal agencies and military partners through both the direct award and competitive procurement processes. We help our country and international partners prepare and respond to emerging infectious disease outbreaks, and we work with our partners to advocate for the judicious and responsible use of antibiotics. Time and again, EGS is sought out to lead the response to infectious disease outbreaks including new tasks and deployments for the SARS-CoV-2 pandemic, ongoing work with Zika, the 2014-2016 Ebola epidemic in West Africa, and myriad other projects and contracts dedicated to reducing morbidity and mortality while controlling costs and streamlining the logistics required to rapidly diagnose and treat patients.

As a small business, EGS is singularly qualified to support federal programs in spheres where previously only large companies have been players. Our 8(a) status allows EGS to accept direct awards (sole-source contracts) up to \$22 million. Awards to an 8(a) ANC cannot be protested. EGS is fully on-ramped to both the OASIS SB Pool 4 and the SB 8(a) SubPool 4 (NAICS 541715 Scientific Services) contracts.

## 24/7 PUBLIC HEALTH SUPPORT

EGS exceeds expectations through our support of the nation's top public health infectious disease programs. EGS provides professional and technical expertise to the CDC, FDA, and DoD. We are focused on helping our country and international partners prepare and respond to emerging infectious disease outbreaks, and we work with our partners to advocate for the judicious and responsible use of antibiotics. EGS is sought out to lead the response to infectious disease outbreaks including new tasks and deployments for the SARS-CoV-2 pandemic, ongoing work with Zika, the 2014-2016 *Ebolavirus* pandemic, and other projects dedicated to reducing morbidity and mortality while reducing costs and streamlining the logistics required to rapidly diagnose and treat patients. Our work reduces the disease burden and costs to public health entities.

## NATIONAL CENTER FOR IMMUNIZATION AND RESPIRATORY DISEASES (NCIRD)

EGS provides professional, technical, scientific, epidemiological, and public health support that involves the prevention and control of respiratory viruses including coronaviruses,

*Lighting the Path  
to Discovery*

Respiratory Syncytial Viruses (RSV), HMPV, parainfluenza viruses, rhinoviruses, and adenoviruses. Our work with the Respiratory Syncytial Viruses Team provides data scientists with extensive epidemiological and data quality experience (e.g., SAS, R, SUDAAN); scientific/medical communication professionals with proficiency in large-scale joint ventures; and personnel with experience in data retrieval and analysis from the New Vaccine Surveillance Network (NVSN) and National Respiratory and Enteric Virus Surveillance System (NREVSS).

## GLOBAL RESPONSE TO HIV/AIDS

EGS provides scientific and professional services in support of the CDC's Division of Global HIV & Tuberculosis (DGHT) with continued efforts to prevent the spread of HIV. The CDC's DGHT is a key U.S. Government implementer of the President's Emergency Plan for AIDS Relief (PEPFAR).

## PARTNERS

- Centers for Disease Control and Prevention (CDC)
- U.S. Global Health Security Agenda's (GHS) RESPIRE project
- New Vaccine Surveillance Network (NVSN) and National Respiratory
- Enteric Virus Surveillance System (NREVSS)
- Division of Global Health Protection (DGHP), Global Disease Detection Laboratory Team (GDDLT)
- Division of Global Migration and Quarantine (DGMO)
