

MILITARY MEDICAL RESEARCH

LIGHTING THE PATH TO DISCOVERY

Eagle Global Scientific, LLC (EGS) is a certified 8(a) Alaska Native Corporation (ANC) that contracts with federal agencies and military partners through both the direct award and competitive procurement processes. We provide essential medical care and help develop the most innovative medical technologies that transcend all domains of Military Medicine. Our scientists and laboratory staff have established and well-respected relationships with many military medical research sites; the innovations developed through these partnerships will improve the treatment of all military personnel and improve public health measures on a global scale.

As a small business, EGS is singularly qualified to support federal programs in spheres where previously only large companies have been players. Our 8(a) status allows EGS to accept direct awards (sole-source contracts) up to \$22 million. Awards to an 8(a) ANC cannot be protested. EGS is fully on-ramped to both the OASIS SB Pool 4 and the SB 8(a) SubPool 4 (NAICS 541715 Scientific Services) contracts.

DEFENSE HEALTH AGENCY

EGS provides senior-level expertise to support the Defense Health Agency (DHA). EGS helps the DHA lead the Military Health System integrated system of readiness and health to implement shared services with common measurement of outcomes; enable rapid adoption of proven practices, reduce unwanted variation and improve the coordination of care across time and treatment venues; exercise management responsibility for joint shared services and the TRICARE Health Plan; and act as the market manager for the National Capital Region (NCR) enhanced Multi-Service Market, which includes Walter Reed National Military Medical Center (WRNMMC) and Fort Belvoir Community Hospital (FBCH).

SUPPORTING THE U.S. MILITARY

EGS supports a wide range of research, clinical, and educational programs across the branches of the U.S. Military. Our work includes efforts at Lackland AFB with the 59th Medical Wing. EGS was recently awarded a ten year, \$250M contract from the U.S. Army Medical Research Acquisition Activity (USAMRAA) to provide Research Activities Support Services (RASS) to

*Lighting the Path
to Discovery*

the U.S. Army. Our clinical capabilities involve comprehensive care for wounded warriors, comprehensive public health promotion, hearing loss prevention and treatment, and physician/pharmacist staffing.

LABORATORY SURGE SUPPORT

EGS was selected to provide expert Senior Clinical Laboratory Consultants, Senior Scientists, and Laboratory Technicians to serve both Camp Zama in Japan and Camp Humphreys in South Korea. This Manpower Services Contract is mission critical to support the current testing for COVID-19 and other emerging microbiological concerns in the Pacific. EGS quickly drew upon our catalog of Public Health Laboratory professionals to meet the requirements and ensure efficient, accurate laboratory support and to provide complex clinical laboratory consulting in challenging environments.

PARTNERS

- U.S. Air Force 59th Medical Wing
- Institute of Surgical Research's (USAISR)
