

# PUBLIC HEALTH COMMUNICATION

LIGHTING THE PATH TO DISCOVERY

Eagle Global Scientific, LLC (EGS) is a certified 8(a) Alaska Native Corporation (ANC) that contracts with federal agencies and military partners through both the direct award and competitive procurement processes. We offer unparalleled editorial project and program management services. Combined with our adept writing and editing staff, editorial managers streamline workflows, increase adaptability, ensure consistency across multiple sub-projects, and incorporate diverse stakeholder needs. Our established, extensive pool of writer-editors and communication professionals responded immediately to the SARS-CoV-2 pandemic in the United States and continue to work with global, national, state, and local health agencies to quickly and accurately communicate information to the public. We offer customizable, client-focused solutions to any project.

As a small business, EGS is singularly qualified to support federal programs in spheres where previously only large companies have been players. Our 8(a) status allows EGS to accept direct awards (sole-source contracts) up to \$22 million. Awards to an 8(a) ANC cannot be protested. EGS is fully on-ramped to both the OASIS SB Pool 4 and the SB 8(a) SubPool 4 (NAICS 541715 Scientific Services) contracts.

## EMERGENCY HEALTH COMMUNICATIONS

EGS provides expertise in medical and health communications. In the National Center for Immunization and Respiratory Diseases (NCIRD), EGS supports the response to COVID-19 through the placement of numerous communication specialists and medical educators in the Emergency Operations Center (EOC). Previously, EGS supported the Division of Public Affairs' (DPA) Zika response through health communications, media (e.g., broadcast, print, and digital), and other agency communication channels. Our past and present work within the EOC includes surge support and emergency response on a 24/7 basis, as required. Our medical and health communication support is strengthened through EGS' employment of highly educated writers and editors, many of whom hold advanced degrees.

Professional and highly experienced writer-editors, social media experts, and broadcast media personnel are available on a 24/7 basis to meet the needs of the CDC and the nation. Our work in the area is well-known due to success in past public health crises including the Zika response and the Ebola outbreaks in

to Discovery*

West Africa. Our personnel adapt quickly to new data and are capable of handling high pressures in any public health emergency.

## SCIENTIFIC & TECHNICAL WRITING

EGS offers a wide-ranging portfolio of scientific, medical, and biosafety publications. Our editors and writers managed the development of *Biosafety in Microbiological and Biomedical Laboratories* (BMBL) 6th Edition, an internationally renowned source for current laboratory biosafety minimum standards. EGS also produced multiple CDC safety texts including annual Biosafety Manuals, Radiation Safety Manuals, and Chemical Safety Manuals. All of our staff are trained in current writing standards and federal requirements including Section 508 compliance. Our seamless unification of editorial management, technical writing, concise communication, and problem-solving makes EGS the best option for any guidance or regulatory publication.

## LOCAL PARTNERS

EGS works with Atlanta-based design agency, [Orange Sparkle Ball \(OSB\)](#), to design the CDC's Global Immunization Division (GID) 2016-2020 Strategic Framework. EGS and OSB provide audience-focused services that are customized to meet the needs of the mission including framing for the general public, public health community, subject matter experts (SME), and community based organizations (CBO).
